Moises De Leon Lugo
Junior Full-Stack Developer | Belleville, NJ 07109
mdeleon5826@gmail.com | www.linkedin.com/moises-de-leon-lugo-72557913b/ | github.com/ares4444

Strong professional and creative software developer that can pick up new languages and systems quickly and can adapt to changing situations as needed. Previously, I majored in Psychology and worked directly with patients with mental disabilities and helped them gain independence throughout their daily lives. Now I look to use the interpersonal and technical skills that I've acquired while learning languages such as: HTML, CSS, Node.js, and React to create interactive and stunning applications.

EDUCATION

- **DigitalCrafts, Atlanta, GA |** Certificate in Full-Stack Software Engineering   June 2022
- **Colorado Technical University, Colorado Springs, CO |** BS of Science in Psychology   December 2018
- **Essex County College, Newark NJ |** ASS in Social Science   June 2015

SUMMARY OF QUALIFICATIONS

- Bilingual: Spanish /English
- Debugging, Git, JavaScript, Node.js, RESTful API, Express, JSON, PostgreSQL, MongoDB, Redux, React, Bootstrap, HTML, CSS, MySQL, Postman, CLI, Microsoft Word, Excel

RELEVANT EXPERIENCE

- **GitErDone –** Backend To-Do List App – github.com/ares4444/BackendGiterdun
  Languages: Node.js, Mongoose, EJS, JavaScript
  Team: 4-person development team
  Features: Users are able to login/register their own profiles. Once logged in the user can create lists (i.e. Groceries, Chores, Items), once created the lists gets added to the users profile and saved into the Mongo database. From there they can update their lists (add/delete items in the lists). Every edit will update the database that is registered to that user.
  Role: Database integration, user Registration/login, website design, route and model, site images
- **MusicalCrafts –** Frontend Music & Lyrics Search App – github.com/ares4444/front-end-project
  Languages: HTML5, CSS, JavaScript
  Team: 4-person development team
  Features: Search by artist or songs and get a list of all the available songs with their respective lyrics. Each song will be contained within their own cards, and the user can press on the dropdown button to show the lyrics
  Role: API integration, DOM fetch JS, search box selection
- **Dragon Ball Memory Game –** React Memory Game App – github.com/ares4444/memory-game
  Languages: React, JavaScript, CSS, HTML5
  Team: Solo
  Features: Click on cards to reveal the image and find all the pairs of the DB characters. Each attempt will be counted. Compete with yourself or others to see who can clear the game in the least moves
  Role: React developer
